

## OS SKILL 5

```
nishanth@LAPTOP-6Q3ON07H:~$ name="Ubuntu"
nishanth@LAPTOP-6Q3ON07H:~$ echo 'Hello $name'
Hello $name
nishanth@LAPTOP-6Q3ON07H:~$ echo 'Home is $HOME'
Home is $HOME
nishanth@LAPTOP-6Q3ON07H:~$ echo 'Date is $(date)'
Date is $(date)
nishanth@LAPTOP-6Q3ON07H:~$ echo 'Hello      World'
Hello      World
nishanth@LAPTOP-6Q3ON07H:~$ echo "Hello $name"
Hello Ubuntu
nishanth@LAPTOP-6Q3ON07H:~$ echo "Home is $HOME"
Home is /home/nishanth
nishanth@LAPTOP-6Q3ON07H:~$ echo "Date is $(date)"
Date is Thu Oct  1 10:14:58 UTC 2026
nishanth@LAPTOP-6Q3ON07H:~$
nishanth@LAPTOP-6Q3ON07H:~$ echo "Hello      World"
Hello      World
nishanth@LAPTOP-6Q3ON07H:~$ single='Hello $USER'
nishanth@LAPTOP-6Q3ON07H:~$ double="Hello $USER"
nishanth@LAPTOP-6Q3ON07H:~$ echo "$single"
Hello $USER
nishanth@LAPTOP-6Q3ON07H:~$ echo "$double"
Hello nishanth
nishanth@LAPTOP-6Q3ON07H:~$ echo 'She said "Hello"'
She said "Hello"
nishanth@LAPTOP-6Q3ON07H:~$ echo "She said \"Hello\""
She said "Hello"
nishanth@LAPTOP-6Q3ON07H:~$ echo "It's Ubuntu"
It's Ubuntu
nishanth@LAPTOP-6Q3ON07H:~$ echo 'It'\''s Ubuntu'
It's Ubuntu
nishanth@LAPTOP-6Q3ON07H:~$
```

Result:

Single quotes preserve the text literally and do not expand variables or commands.

Double quotes preserve spaces but allow variable expansion and command substitution.

```
name="Ubuntu"

echo 'Hello $name'
echo "Hello $name"

echo 'Home is $HOME'
echo "Home is $HOME"

echo 'Date is $(date)'
echo "Date is $(date)"

single='Hello $USER'
double="Hello $USER"

echo "$single"
echo "$double"

echo 'She said "Hello"'
echo "She said \"Hello\""

echo "It's Ubuntu"
echo 'It\'\'s Ubuntu'
```

```
nishanth@LAPTOP-6Q3ON07H:~$ nano quotes.sh
nishanth@LAPTOP-6Q3ON07H:~$ bash quotes.sh
Hello $name
Hello Ubuntu
Home is $HOME
Home is /home/nishanth
Date is $(date)
Date is Thu Oct  1 10:18:22 UTC 2026
Hello $USER
Hello nishanth
She said "Hello"
She said "Hello"
It's Ubuntu
It's Ubuntu
```
